COMP 2680-01

FALL 2020

Due: December 2, 2020

Casa Del Humidor

Business Statement:

This business provides great quality cigars and excellent customer service. Their main goal is to make the customers feel comfortable the second that they walk in, and their accommodations exceed expectations. They even have a heated, covered patio for those cold, winter days. Their priority is the customer, and this is why the staff are carefully picked and trained with the knowledge necessary to help the customer in every way that they can.

Project Objectives:

The objective for this project was to learn how to develop a website from scratch. The objective for choosing this specific business is to hopefully present them with my finished product and they will want to use it for their store. This website should visually please the user, and stop any hesitation to visit the nation's largest humidor.

How the business would benefit from my website:

The current website for this business is nice, but the footer is fixed at the bottom and takes up way too much space on the page. There is also no responsive design for mobile phones or tablets. My website provides a clear visual of what the business can offer their customers. I can transform their website from a basic information website to a user-friendly, responsive design with more information that the customer will be looking for.
